

Presents the new

AndraBasket

&

AndraBasket (micro)

AndraBasket High Performance

- Superior strut material made from shape memory metal NITINOL!
- NITI struts are prone to perform with best performance during the foreign body retrieval. So capturability is much higher!

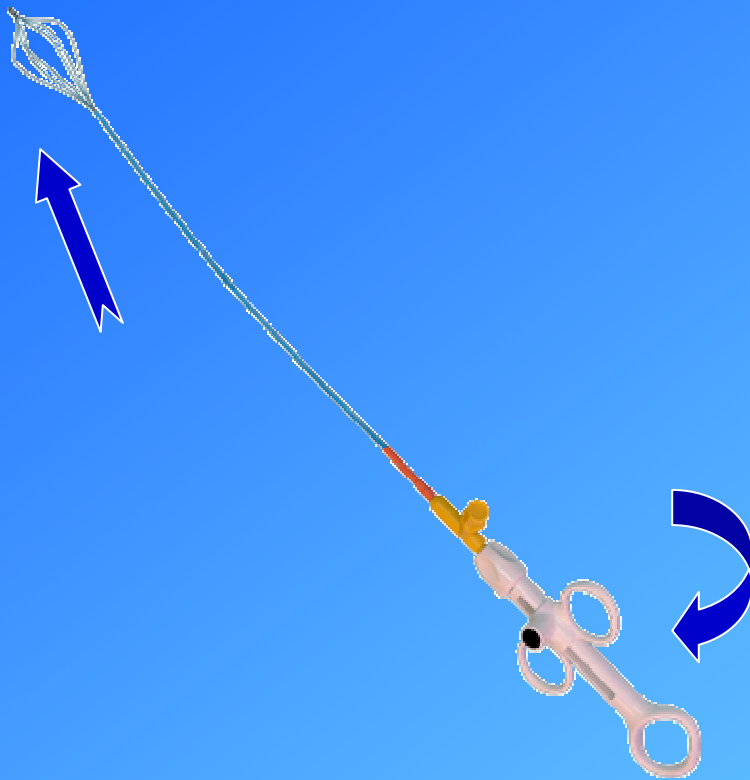

AndraBasket & Comfortibility

AndraBasket is one of the few Dormia Baskets coming with a comfort handle!

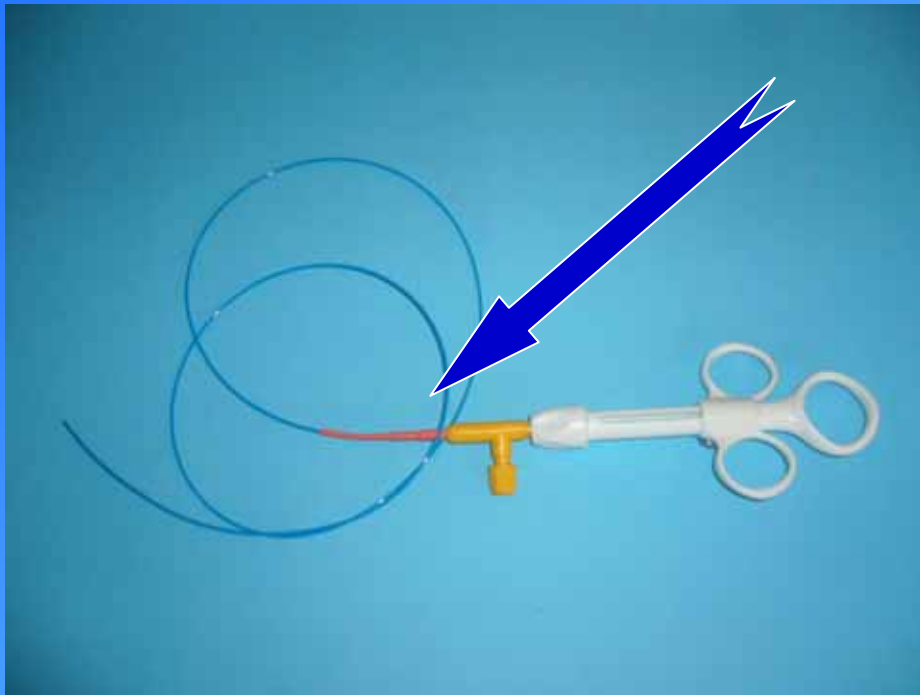

- Allowing a much more precise way of manipulating and therefore increasing the chance of capturing!

AndraBasket Control Made Easy

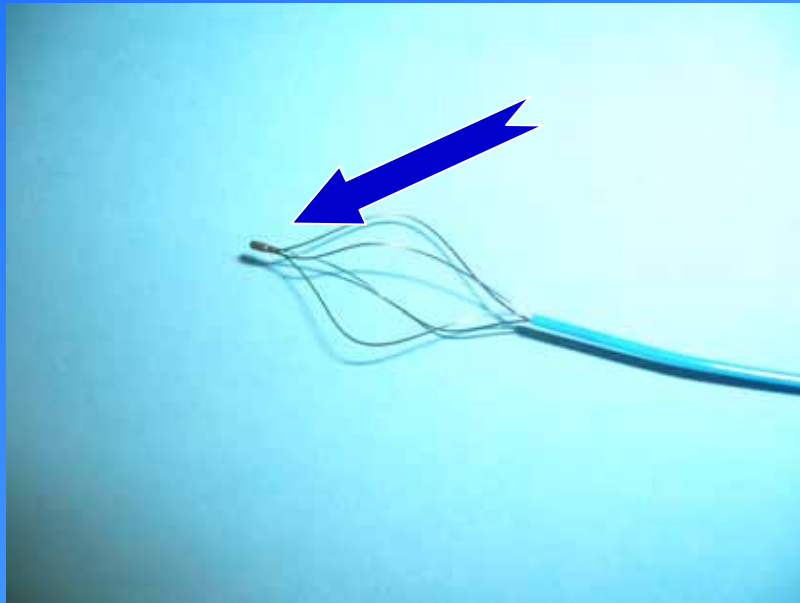

- AndraBasket has a high torque control
- Torque is increased by the comfort handle
- Allowing detailed Captureability and precise manipulation (near 1:1 torque)

AndraBasket & Safety

- AndraBasket has a unique extra long supportive sleeve at the proximal end of the catheter!
- Allowing the AndraBasket catheter manipulation without kinking and breaking!

AndraBasket & Visibility

- AndraBasket has radiopaque markers!
- Ensuring the the safe & confident manipulation with full retrieval abilities!

AndraBasket & Variance

- AndraBasket has a high product variability
- Markets best sheath compatibility (2F-4F)!
- Allowing more space during the procedure; minimal puncture site for the patient!
Better procedural outcome!

AndraBasket & Service

- AndraBasket has a **4 years sterility time!** All the other Basket Devices only come with a 2 years shelflife!
